

# Multiplication Circle

Get Set 4  
Education

**What you need:** someone to call the numbers and 10 items.

## How to play:

- Place the items in a large circle.
- The player begins in the middle of the circle.
- Someone calls a number between 1 - 10. The player must collect the number of items called from the outside of the circle and place them in the middle of the circle.
- Players can only move one item at a time.
- After a few rounds, make this harder by adding a multiplication question to the game e.g. 7 would mean the player must place 7 items in the centre of the circle, leaving three on the outside. The player must then call the answer to  $7 \times 3$ . They return all the items to the outside to begin again.

**How quickly can you move the items?**
